

COLOURED NUMBER CODES

These coloured number codes are great for implementing research-proven CRA methodology in your maths lessons - in a simple and easy way!

By using Concrete-Representational-Abstract methodology with your student, you enable them to understand maths in a much more powerful way.

Paired with the specific colours of the Maths Australia Integer Blocks, these number codes help your student make the transition from concrete to abstract by using the same system of number colours. This helps them remember that 2 is orange, 3 is pink and keep working with numbers on the page in the same engaged way as they do with the hands-on blocks.

Useful for parents and teachers, these number codes are easy to print off and can be used straight away!

0 1 2 3 4 5 6 7 8 9

0 1 2 3 4 5 6 7 8 9

0 1 2 3 4 5 6 7 8 9

0	1	2	3	4	5	6	7	8	9
