

TEACHER LESSON CHECKLIST

Preparing for the Lesson

- ☐ Watch video lesson
- ☐ Review instructional strategies in Instruction Manual
- ☐ Use maths vocabulary from video lesson
- ☐ Use maths strategies from video lesson

Present Lesson Concepts

- ☐ Can show video lesson to student (this must not replace direct instruction by teacher)
- ☐ Summarise maths concepts to be taught
- ☐ Demonstrate how to build and solve and the problem with the manipulatives
- ☐ Show your student how to write the equation of problem step-by-step, as it is being built with the manipulatives
- ☐ Verbalise (say) each step of solving the problem while building and writing the equation
- ☐ Review the "Build, Write, Say" process with your student to prepare for lesson practice

Practice until Your Student Demonstrates Mastery

- ☐ Closely observe your student as they work through the practice pages, re-teaching concepts as needed. Use the manipulatives. Remember, students do not need to complete every workbook page for the lesson if mastery of the topic is evident.
- ☐ Review individual student results of Lesson Practice pages, Systematic Review pages, and Lesson Test results to determine your student's understanding and retention of the concepts.
- ☐ Identify which key areas need more time and focus for your next lesson.

Remember, proceed to the next lesson only once mastery has been achieved
