1-DAY NUMERACY INTERVENTION TRAINING

Making Foundational Maths More Accessible for Every Learner

“How do we make maths meaningful, accessible and achievable for every learner?”

Transform the way you support students who struggle with mathematics. Learn practical, evidence-based strategies to identify learning gaps, strengthen mathematical understanding through explicit, multi-sensory instruction, and confidently support students with diverse learning needs, including autism, ADHD, dyscalculia, physical and intellectual disabilities, and other learning differences.

This comprehensive professional learning is designed for teachers, learning support staff, tutors and intervention specialists who want practical strategies they can implement immediately to improve student outcomes.

Especially relevant for educators supporting students with:

Intellectual & physical disabilities

ASD

ADHD

Dyscalculia

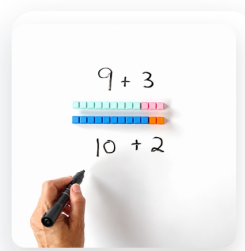

Maths anxiety

Complex & additional learning needs

+ 1-Day In-Person Workshop + 12 Months of Professional Learning & Support

The in-person workshop is complemented by 12 months of ongoing professional learning and implementation support.

- ✓ 1-Day in-person workshop (10:00am–3:00pm AEST, Wed 14 October)
